# MANIFEST

Our mission is to un-limit an athlete's pursuit of fun through our technological advances in engineering. The company is based around our love for all forms of shredding. We all push the boundaries in search of freedom. Our products are the brainchild of the athletes using them, and are produced with materials of the highest quality. We make the products of our dreams, with passion, love, and know-how.

# TECHNOLOGY

# NODISTORTION

SHRED's patented solution to the downfall of the commonplace: warped and distorted vision due to even small elevation changes. Traditional goggles are prone to blur and alter rider's true perception as lenses bubble and breakdown under pressure, but our **NODISTORTION™** technology ensures perpetual crystal clear vision.

mountain base

even with **small** elevation changes

TRADITIONAL **NODISTORTION™**

TRADITIONAL **NODISTORTION™**

clear IMAGE  
TRADITIONAL LENS

clear IMAGE  
**SHRED NODISTORTION™ LENS**

warped IMAGE  
TRADITIONAL LENS

clear IMAGE  
**SHRED NODISTORTION™ LENS**

## MAIN ADVANTAGES::

- Equalizes pressure between the lenses and the outside.
- Adjusts to varying altitudes to avoid optical distortion typical of traditional double lenses.
- PORON™ filter keeps water, snow and moisture out of the lens.
- The lens doesn't deform and your vision is always crystal clear.

## HOW DOES IT WORK?

AIR FLOW = PRESSURE EQUALIZING

PORON™ FILTER = WEATHER BARRIER

# NODISTORTION with NXT lenses

As a result of our constant and relentless innovation, we sought to improve upon an already stellar offering of sunglasses by bringing our **NODISTORTION™** technology from goggles to shades. Crafted and tested under the most extreme conditions, **NXT™** lenses are tested under the harshest of conditions with the US Air Force. Designed to provide unparalleled vision quality and durability, liquid cast **NXT™** lenses result in crystal clear vision.

TRADITIONAL LENSES OPTICAL DISTORTION

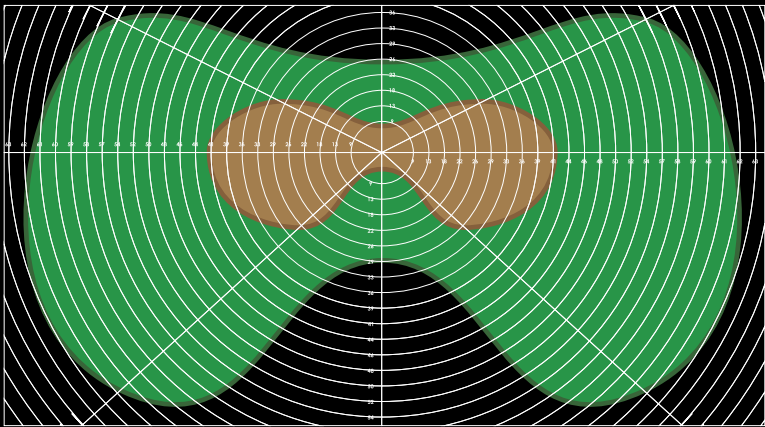

SHRED NODISTORTION™ with NXT™

## MAIN ADVANTAGES::

- Stunning crystal clear vision.
- Superior durability and scratch resistance.
- Incredibly high impact resistance tested on windshields of jet fighters and helicopters.

# SHREDWIDE

**Shred WIDE™** Technology allows for maximum field of view. Participating goggles in our line are designed to provide the maximum possible breadth of vision to give riders uninhibited view of the snow and their surroundings. Created by providing the largest angle from the center of the eye to the edge of the frame, we can back up our claims where competitors merely seek to give the impression of expanded vision. **TRUE UNINHIBITED FIELD OF VIEW.**

Comparison chart between SHRED AMAZIFY, developed with SHREDWIDE technology and model A from brand D (you know what it is).

**Out-performs** all other supposed-to-be wide goggles based on overall performance across all directions of vision. SHRED tested its **Stupefy**, **Smartefy**, **Amazify** and **Monocle** goggles' field of view performance against competing brands' goggles that are claiming wide peripheral vision. SHREDWIDE goggles have by far the widest field of vision results across all the directions tested on a scaled vision target chart.

# NOCLOG

To promote ventilation along the top of our goggles, our new **NOCLOG** technology incorporates a Hydrorepellency Treatment to allow warm air to escape and cool air to flow in to keep your vision crystal clear. Our Hydrorepellency Treatments increases the surface tension of water and moisture on the goggle foam to reduce surface contact and clogging to a minimum.

TRADITIONAL GOGGLES VENTS FOAM

SHRED NOCLOG

## MAIN ADVANTAGES::

- Reducing the adhesion and accumulation of water on foam vents.
- Minimizing the area of contact surface between the water drops and the vent foam.
- Improving the warm/cold air exchange to minimize fogging.

# SHRED NOSEASON

One helmet for all that you would ride.

We did something we were told was impossible: we made an in-molded helmet that can simultaneously pass safety regulations for European and American snow and bike standards. Certified according to: EN1077B, EN1078, ASTM F2040, CPSC.

Our riders have multisport needs and we can provide a multisport helmet with transferrable style for **SHRED NOSEASON** use.

The impossible made possible thanks to **SLYTECH NOSHOCK™** patented impact dissipation system that allows us to have helmets with outstanding safety performance no matter the setting.

**A true safety pinnacle in the action sports industry.**

# NOSHOCK HELMETS

Composite Honeycomb Cone Structure of **SLYTECH 2ND SKIN™ XT** and Toughened EPS revolutionizes safety standards across the action sports world due to **SLYTECH NOSHOCK™** Honeycomb Cone Structure.

Unidirectional distribution of impact energy  
(traditional helmets)

Multidirectional distribution of impact energy  
(**SLYTECH NOSHOCK™**)

## MAIN ADVANTAGES::

SLYTECH NOSHOCK™ Honeycomb Cone Structure

- Minimizes use of material = low weight.
- Absorbs efficiently shocks because of its
  - + very high strength-to-weight ratio.
  - + structural strength allowing multi directional impact energy dissipation.

with SLYTECH 2ND SKIN™ XT

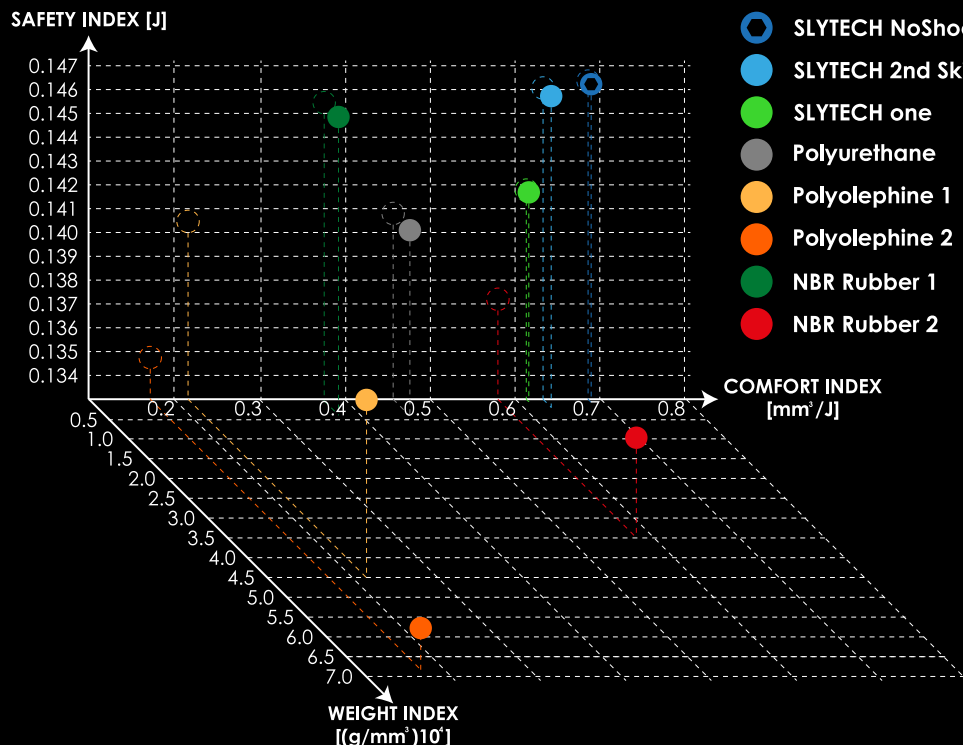

- Absorbs shocks progressively.
- Adapts intelligently to different forces and speeds of a crash, providing thorough protection on lower energy impacts.
- Recovers naturally from the impact = Better protection in a series of impacts.

PROVIDES A UNIQUE SHOCK ABSORBING SYSTEM, WITH SUPERIOR PERFORMANCE.

# NOSHOCK BODY PROTECTION

At Slytech, we refuse to compromise one for the other, and as a result of our proprietary SLYTECH 2ND SKIN™ XT foam material shaped under our new SLYTECH NOSHOCK™ proprietary design, we have widened the performance gap between our products and the field. In years past, we have been the market leader in both safety and comfort, but with our new SLYTECH NOSHOCK™ technology adapted for back and body protection, we have widened the gap in a four dimensional way; SLYTECH NOSHOCK™ technology design means that our gear is not only a 20% safer when compared to a plain design, but it is also way more comfortable, it has a lower specific weight and promotes better ventilation as a direct result of the honeycomb cone hollow structure.

SLYTECH NOSHOCK™ technology laps the field and widens the gap between our protection – which is becoming more and more the truly universal choice among athletes – and our competitors'. With a four dimensional simultaneous improvement in safety, comfort, ventilation, and specific weight reduction, SLYTECH NOSHOCK™ has revolutionized protection technology. Honeycomb cone shaped SLYTECH 2ND SKIN™ XT foam allows for multidirectional distribution of impact energy and recovery of SLYTECH NOSHOCK™ foam for multi-impact bails.

## MAIN ADVANTAGES:

- Four dimensional unparalleled and market standard levels of:
  - + safety
  - + comfort
  - + ventilation
  - + weight

# SLYTECH 2ND SKIN™ XT

Progression is monumental to the direction of our company, and that's exactly what we are achieving through our formula to improve comfort and increase the dynamic capabilities of our protection without sacrificing any protection quality. We see competitors deciding to make a tradeoff: either they sacrifice comfort for protection, or vice-versa. We don't. Our proprietary **SLYTECH 2ND SKIN™ XT** foam is truly special.

**SLYTECH 2ND SKIN™ XT** foam formula adapts intelligently to all impacts to maintain its compliant nature in low-force impact, and is rigid at higher impact speeds to progressively match the intensity of all blows sought in the name of a boundless world. Independent studies reveal that when tested against other traditional protectors with plastic shells or Polyurethane foams, Slytech Protectors provide considerably more protection at any impact level, from low energy falls to highest impact crashes, keeping you out of the impact danger zone where bones break and serious injury occurs. The polygonal closed cell foam formula gives our riders more protection, more comfort, and more durability, period.

**HIGH IMPACT  
RESPONSE**

**RIGID**

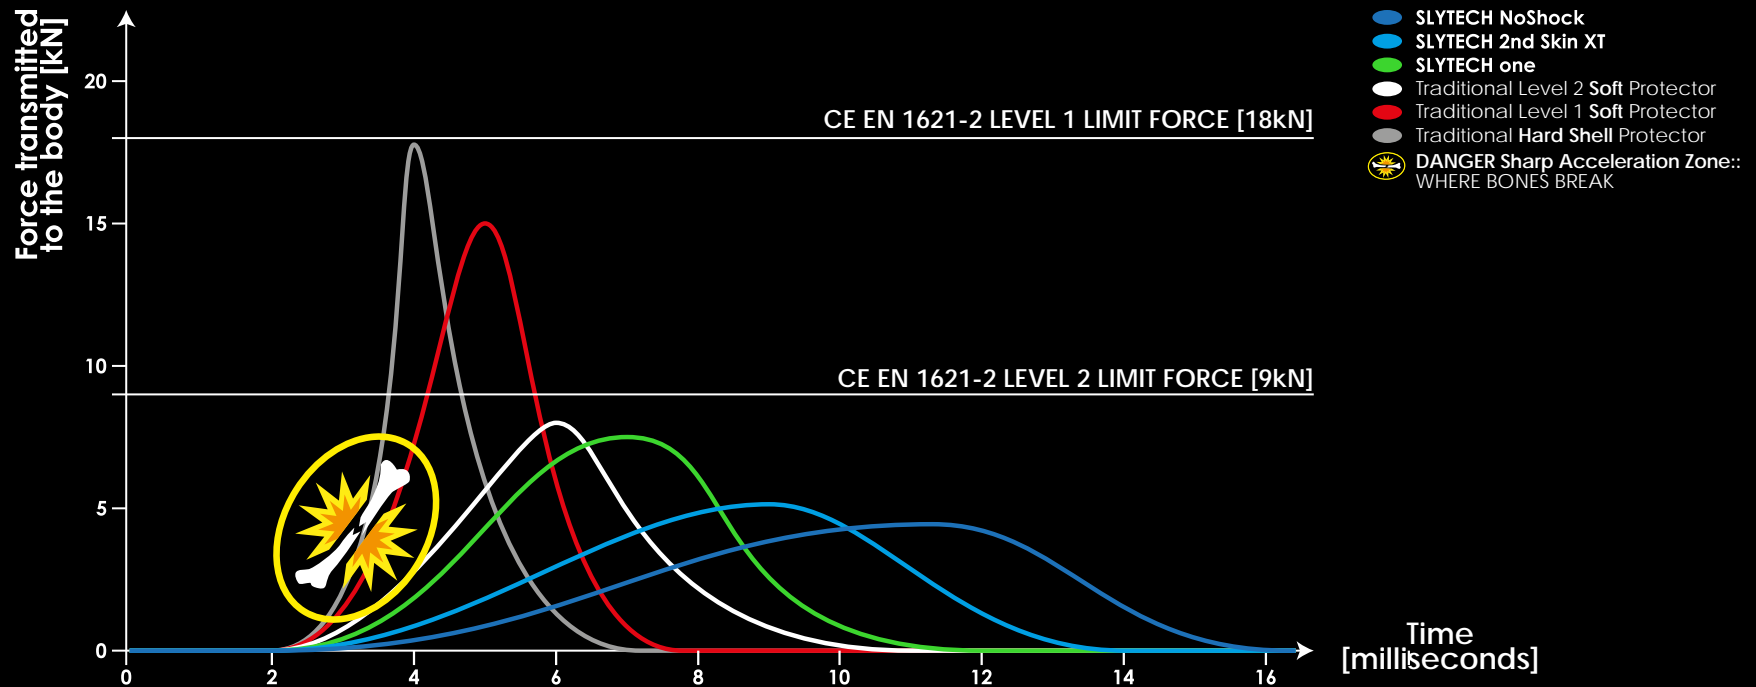

**LOW IMPACT  
RESPONSE**

**COMPLIANT**

Our **SLYTECH 2ND SKIN™ XT** formula improves athlete comfort without sacrificing any protection. We've increased the flexibility of our material, no matter the temperature. We want to continue to give boundless products to athletes to be able to push themselves as far as they are willing to go today, tomorrow, and day after day.

# SLYTECHone

Our years of exhaustive search and extensive materials research for the most uncompromising polymer compound in terms of safety versus comfort allowed us to derive a compound that preserves market leadership without breaking the bank. All of our **SLYTECH one** line is compliant with EN 1621-2 standards offering a MULTI IMPACT solution that adapts intelligently to different forces and speeds of impact.

The graph above represents the forces transmitted through different back protectors and those perceived by the spine in a lab test simulating a high impact crash. After impact, the diagram shows that the perceived forces and accelerations on someone wearing a hard plastic back protector will rise to a point where bones are readily broken. Those perceived on someone wearing a traditional soft back protector will be less dramatic, but still harmful. On the hard shell protector, the plastic outer surfaces are unable to offer absorption of conveyed forces, and on the traditional soft protector the microstructure is unable to provide a thorough protection. On the other hand, the SLYTECH NOSHOCK™, SLYTECH 2ND SKIN™ XT and SLYTECHone back protectors, with their intelligent polygonal cell foam, absorb the forces smoothly and effectively, resulting in far fewer injuries.

# SPOTLIGHT

# AMAZIFY

The Amazify is a universal fit and almost-frameless cylindrical goggle with our SHREDwide technology to ensure an authentic and almost boundless field of view with our SHRED CARVED LENSES and NODISTORTION™ technology for perfect vision. The clean retro look combined with the ultimate in technology is the pinnacle of uncompromised style and performance that only SHRED can offer.

# SLAM-CAPNOSEASON

As a direct result of our Slytech NOSHOCK™ technology in the SHRED Slam-Cap NOSEASON helmet line, we are proud to offer a product that was said to be impossible; to be able to simultaneously pass European and US safety standards for both snow and bike with an in-molded, superlight helmet. With superior safety ratings, the Slam-Cap NOSEASON is perfect in transition from the mountain, to the park, to the pipe, to your bike, and back again with three different configurations for wherever you're shredding; all without feeling the weight of the helmet.

# PROVOCATOR<sub>NOWEIGHT</sub>

The all-new PROVOCATOR NOWEIGHT is the tangible result of our simultaneous leap toward furthering performance without compromising style, and our collective search for eco-consciousness without conceding to bland aesthetics. The base eight sunglasses are handmade in Italy with our SHRED NOWEIGHT technologies and superior optical performance associated only with SHRED. Our SHRED NOWEIGHT design technology is a derivative of structural engineering studies that allows us to create a shape that minimizes the amount of material used while maximizing the stability and performance of the eyewear. The frame is constructed out of a polymer formulation based on high crystalline polyamide, which is derived from a natural oil to maintain our focus on eco-consciousness.

# BACKPRO NOSHOCK

SLYTECH NOSHOCK™ technology laps the field and widens the gap between our protection – which is becoming more and more the truly universal choice among athletes - and our competitors'. With a four dimensional simultaneous improvement in safety, comfort, ventilation, and weight reduction, NOSHOCK™ has revolutionized protection technology. Honeycomb cone shaped SLYTECH 2ND SKIN™ XT foam allows for multidirectional distribution of impact energy and recovery of SLYTECH NOSHOCK™ foam for multi-impact bails.

# BACKPROONE

SLYTECHone NAKED offers an entirely streamlined protection offering for those looking for a cost-effective option that is at its heart a performance oriented product with the perfect combination of simultaneous safety and comfort. The SLYTECHone NAKED delivers a low profile protector with a BELT CONNECTOR to ensure perfect placement.

# FORTRESS PWD - 3 in 1

Our athletes asked for it, and our product wizards delivered. This unique 3 in 1 glove was born directly from the needs and brains of our riders. Unzip them on the side to use them as a five-finger glove to climb sketchy rocks, use your touch-screen phone and regulate temperature, shred the park with the SLYTECH 2ND SKIN™ XT foam protected first liner, or just enjoy those warm spring sessions with the breathable and light external liner.

SHRED W

# GOGGLES

benji ritchie

photo // marcus caston

Driven by the dreams of our athletes, technology of today, and vision for tomorrow, our comprehensive line of goggles is molded from progression and stands alone amongst imitations and forgeries. Each and every component of our goggles are the physical manifestations of progress as we strive and succeed to produce countless unique, powerful, and flawless tools for the ones bold enough to break all boundaries that attempt to surround us.

**NODISTORTION™** Our patented NODISTORTION™ lens technology keeps your vision from getting warped. Traditional double lenses are sealed air tight to prevent fogging and keep moisture from getting in between the layers. But then when you gain or lose altitude, the pressure differential causes the two lenses to bend and warp, which causes distortion in your vision. So we designed a small valve to equalize the pressure between the lenses and the outside, and we use a high tech PORON™ filter to keep moisture out. So the lens doesn't deform and your vision is always crystal clear.

SHRED POLARIZED lenses reduce glare by blocking out all angles of scattered and reflected light from surfaces such as snow and water. The polarization process eliminates light that distorts color and enhances depth perception and vision. The result is a clean lens that delivers proper clarity and contrast and achieves the optical perception Shred

These lenses are TRULY designed to perform under the widest spectrum of light and weather conditions. After years of extensive field tests we came to understand that it was not a matter of light transmission, but instead of contrast and definition. Our STEALTH REFLECT lenses feature a contrast and definition enhancing tint that provide unique performance in any condition, from fog and flat light to bluebird, all the way to dark afternoons and snowy days. All this while providing effective UVA protection even on the brightest days on the glacier.

**SHRED NOCLOG** To promote ventilation along the top of our goggles, our new SHRED NOCLOG technology incorporates a Hydrorepellency Treatment to allow warm air to escape and cool air to flow in to keep your vision crystal clear. Our Hydrorepellency Treatment increases the surface tension of water and moisture on the goggle foam to reduce surface contact and keep clogging to a minimum.

Our SHRED CARVED lenses are the result of a super-precise production process that crafts lenses with a tapered lateral thickness to adapt to the eye's vision power. SHRED CARVED lenses are made without straining the polymers, which results in perfect clarity of vision. Available in SPH, with a double curvature and CYL, with single curvature of the lens.

SHRED WIDE Technology allows for maximum field of view. Participating goggles in our line are designed to provide the maximum possible breadth of vision to give riders uninhibited view of the snow and their surroundings. Created by providing the largest angle from the center of the eye to the edge of the frame, we can back up our claims where competitors merely seek to give the impression of expanded vision.

The double lens technology used in most SHRED Optics goggles creates a thermal barrier that keeps the inner lens warm and dry. A special hydrophilic treatment on the inner lens allows the surface to absorb moisture before fog can form.

No gimmicks, no tricks, and no fake technology; SHRED NO BS. Our new lens replacement system, crafted through an updated mix of polyurethane with reduced friction parameters and improved installation notch shape and positioning, gives riders the easy option to change their lenses, without breaking the bank and without sacrificing performance and durability.

Our fully rigid case is designed to protect your SHRED CARVED spare lenses; the elastic band will secure the lens inside. It perfectly fits inside jackets or backpacks, so riders have a spare lens ready for any change of conditions with an easy lens replacement thanks to the NO BS technology.

The strap is made from bamboo pulp fiber. Bamboo is one of the world's most sustainable resources. It is the fastest growing grass and can shoot up a yard or more a day.

Grip-On straps provide the necessary grip so that goggles will not slip off your headwear.

Blocks 100% of all harmful UVA, UVB, and UVC rays.

The shape of SHRED goggles allows for the best integration with any kind of helmet.

SHRED's new Tapered Foam allows for extreme comfort and universal fitting.

The Blue Whipped Cream Multilayer Face Foam provides extremely soft comfort, sweat management, and extended durability.

# HOYDEN

With the best technology we have, the HOYDEN goggle offers a small face option in our SHRED CARVED LENS technology and with the same style and performance standards our world champs and pro riders are rocking. Flexible frames to mold to all varieties of small faces and universal helmet compatibility come standard in our mission to develop the next generation of pros.

ALL CONDITIONS LENS. These lenses are TRULY designed to perform under the widest spectrum of light and weather conditions. After years of extensive field tests we came to understand that it was not a matter of light transmission, but instead of contrast and definition. Our STEALTH REFLECT lenses feature a contrast and definition enhancing tint that provides unique performance in any condition, from fog and flat light to bluebird, all the way to dark afternoons and snowy days. All this while providing effective UVA protection even on the brightest days on the glacier.

VLT is the amount of light transmitted through a lens. VLT transmittance is then translated into a Lens Category Number. The higher the number the more visual light that is transmitted through the lens. The lower the CAT number the more visual light that is transmitted through the lens. Filter Category classified as: S0 Very light lens, S1 Light lens, S2 Medium lens, S3 Dark lens, S4 Very dark lens

CASES

**SINGLE LENS HOLDER BAG**

- Soft case to protect your SHRED spare single lenses.
- 5 pockets hold up to 10 spare single lenses.

code: **LHB**

**GOGGLE HARD CASE**

- Fully rigid case designed to protect your SHRED goggles.
- Black with a neon green zipper.

code: **DACBACD11**

**CARVED SPHERICAL LENS THERMAL CASE**

- Fully rigid case designed to protect your SHRED CARVED STUPEFY and SMARTEFY spare lenses.
- Black with an elastic band to secure the lens inside.
- Perfectly fits inside of your jacket or backpack, for you to be ready for any change of conditions.

code: **DACTCSF**

**CARVED CYLINDRICAL LENS THERMAL CASE**

- Fully rigid case designed to protect your SHRED CARVED AMAZIFY spare lenses.
- Black with an elastic band to secure the lens inside.
- Perfectly fits inside of your jacket or backpack, for you to be ready for any change of conditions.

code: **DACTCCF**

2 SPARE STRAPS KITS

- compatible with
- STUPEFY
  - SMARTEFY
  - MONOCLE
  - SOAZA
  - HOYDEN
- Customize your look on SHRED goggles like the PROs.
  - Compatible with Stupefy, Smartefy, Monocle, Soaza and Hoyden.

# HELMETS

brendon hart

photo // marcus caston

Committed to safety - no compromises. At SHRED, our mission is driven by our collective love for action sports. We are determined to create the safest and most comfortable helmet available in the market. All of our helmets meet and exceed both CE and ASTM standards, and we relentlessly research and pioneer the latest innovations in materials and technology to provide ourselves, our athletes, and every one of our consumers with the same safety standards. Without the best protection available, it is impossible to continuously push progression.

This helmet features Slytech's latest impact protection innovation with its SLYTECH 2ND SKIN™ Foam Technology. A layer of SLYTECH 2ND SKIN™ is added to provide a progressive shock absorber that intelligently adapts to the different forces and speeds of a crash. The shock absorption increases proportionally to the strength of the impact, allowing to protect completely at any impact level. In addition, the SLYTECH 2ND SKIN™ recovers naturally from the impact and allows for better protection in a series of impacts.

This helmet meets and exceeds EN 1077B, a European Standard for Helmets for Alpine Skiers and Snowboarders. Certified EN 1077B helmets pass the same severe shock absorbing tests, retention system performance, field of vision, and durability as the EN 1077A. The difference is a smaller coverage: the norm allows soft ear pads, for maximum comfort.

This helmet meets and exceeds CE EN 1078, a European Standard for Helmets for Pedal Cyclists and for Users of Skateboards and Roller Skates. Certified CE EN 1078 helmets pass severe shock absorbing tests, retention system performance, field of vision and durability. These tests are performed at low, high and room temperature, and also after artificial ageing.

Inmolded construction fuses a tough polycarbonate and dent resistant outer shell with the helmet's impact absorbing soft EPS foam liner for extra durability while maintaining its super lightweight. Protection, comfort, and performance are maximized.

The helmet comes with 2 removable and interchangeable linings, and 2 sets of adjustable and interchangeable earpieces, meaning 4 different combinations. A perfect fit for everyone.

The QUICK RELEASE PRECISION BUCKLE has been improved even further and provides ultimate safety and comfort.

SHRED Dual Density EPS liner is designed to enhance impact absorption by adjusting thickness and density in key areas of the helmet.

The soft ear pads are ready to host an after market compatible audio system.

All SHRED helmets exclusively incorporate the ICEdot identifier technology. ICEdot Identifiers work hand-in-hand with the ICEdot service to identify the athlete to first responders and notify his/her loved ones in case of emergency. The ICEdot x Shred membership PIN is printed on the helmet, linking to a personal ICEdot x Shred online account with the athlete's identification, medical info, and emergency contacts. This info can be accessed by any first responder with a cell phone. That might be a fellow boarder, skier, or a trained paramedic, you never know.

This helmet meets and exceeds ASTM F2040, the American National Standard for Helmets Used for Recreational Snow Sports. Certified ASTM F2040 helmets pass very severe dynamic strength retention, roll-off (for positional stability), and impact tests with three different anvils. At low, high, and room temperature.

This helmet meets and exceeds U.S. CPSC standards, the Consumer Product Safety Commission's Safety Standard for Bicycle Helmets. Certified CPSC helmets pass very severe tests, at low, high and room temperature as well as after water immersion. The testing includes Peripheral Vision, Positional Stability (Roll-Off), Dynamic Strength of Retention and Impact Attenuation tests.

X-STATIC™ is a fiber made with a layer of 99.9% pure silver, which is permanently bonded to the surface of the fabric, providing unparalleled Antimicrobial and Anti-odor properties. A permanent solution to keep your gear fresh, highly breathable, and extremely comfortable.

The earpads can be detached, moved, and repositioned to customize the fit around the ears for an extreme comfort, perfect hearing, and no pressure points.

The liner is folded over the vents to stop the flow of air during cold days, but can easily be folded back in for best ventilation.

This helmet is engineered with an ultimate FIT FINDER system allowing everyone to identify his best fit and position for the helmet on the head and with the goggles by simply adjusting the positions of the 3 arms to which the FITTING WHEEL is connected. A higher position in the back of the head will mean the helmet will be allowed to rotate backwards and fit oversized goggles such as SHRED STUPEFY and MONOCLE. A central position in the back of the head will mean the helmet will have a fit optimized for standard and wide field of view goggles such as SHRED SMARTEFY and SOAZA. A lower position in the back of the head will mean the helmet will be allowed to rotate forward and fit smaller face goggles such as SHRED TASTIC. The arms on the side/temples will allow to customize the play of the FITTING WHEEL to provide a snug and comfy fit to everyone.

This helmet meets and exceeds EN 1077A, a European Standard for Helmets for Alpine Skiers and Snowboarders. Certified EN 1077A helmets pass severe shock absorbing and penetration tests, retention system performance, field of vision, and durability. These tests are performed at low, high, and room temperature, and also after artificial aging. These helmets have the plastic shell covering all the way down to the ears, for maximum safety at high speed.

This helmet is thoroughly tested and approved according to the new FIS 2013 RH standards which will be mandatory for all FIS races starting from November 2014. These new norms require the helmets to provide the same level of safety of the EN1077A norm, but with over 20% higher speed in the crash test.

The SHRED Wheel makes it easy to dial in a custom fit in seconds, even with gloves on. An ergo-friendly dial at the base of the helmet provides up to 6cm of adjustment and enhanced stability.

One helmet for all that you would ride. We did something we were told was impossible: we made an inmolded helmet that can simultaneously pass safety regulations for European and American snow and bike standards. Certified according to: EN1077B, EN1078, ASTM F2040, CPSC.

Our VENTS SWITCH provides a unique solution with an embedded ultra precision 3 positions switch inside the goggle buckle holder. The switch can also be replaced by a freestyle/summer version without the goggle clip.

SHREDVent uses a system of helmet vents to keep your head cool and pull warm and moist air out the goggles and exhaust it out of the helmet to prevent fogging.

SHRED NOSHOCK™ patented technology is a Honeycomb Cone Structure made in our proprietary SLYTECH 2nd SKIN™ XT. This structure is co-injected with a toughened EPS foam liner to provide a high structural strength, which dissipates impact forces multi-directionally to spread the impact of the force laterally, and limits the transference through the helmet to your head.

The X-STATIC™ or SHREDry comfortable lining is removable for easy cleaning.

lupe hagearty

## SLAM-CAP<sup>NOSEASON</sup>

True progression can only be born out of innovation. The SLAM-CAP NOSEASON™ is nothing but revolutionary, and an accomplishment we were told would be impossible. It is an in-molded helmet with an embedded layer of SLYTECH NOSHOCK™ Honeycomb Cone Structure within the injected EPS foam simultaneously meets and far exceeds European and American safety standards for both snow and bike. At it's core is the SLYTECH NOSHOCK™ in a Honeycomb Cone Structure to provide a high structural strength, which dissipates impact forces multi-directionally to spread the impact of the force laterally, and limits the transference through the helmet to your head. Superior comfort through the ultra precision VENT SWITCH with 3 positions, X-STATIC™ silver fiber liner and SHREDWheel supplement ICEdot technology to provide one of the safest, lightest, and most comfortable helmets on the market that is ready for the snow, the dirt, the park, or the streets. Meets and exceeds standards: CE EN 1077, ASTM F2040, CE EN 1078, CPSC.

# MEGA BRAIN BUCKET<sub>RH</sub>

Maximum safety for the most dangerous missions, but in style. Built by and for the pros who require compliance with the toughest safety requirements, with the revolutionary SLYTECH 2ND SKIN™ inside, the new MEGA BRAIN BUCKET RH is thoroughly tested and approved according to the new FIS 2013 RH standards. These new norms require the helmets to provide the same level of safety of EN1077A helmets at over 20% higher speed of impact. MEGA BRAIN BUCKET RH production process ensures the highest quality and it features ICEdot technology, removable X-STATIC™ silver fiber inner lining providing unparalleled Antimicrobial and Anti-odor properties as well as a comfortable and dry fit, Custom Fitting system and Adjustable Ear Pads. Meets and exceeds CE EN1077/A, ASTM F2040 as well as FIS 2013 RH race helmets requirements for the highest safety standards.

# SUNGLASSES

ted ligety

Dripping with style and infused with technology, we researched the most high quality materials to drop into each and every frame. To create something truly unique with unmatched character we offer a robust line of either handcrafted or abnormally light frames, and all of them are made in Italy. We have dropped in NODISTORTION™ with NXT polarized and non-polarized superior optical quality lenses, multilayer acetates, and we have instituted warm materials such as wood in some of our rare frames. As most companies have moved toward mass production, we have forged our own path to offer the truly uncommon. The basic material of our handcrafted line is our cellulose acetate, plant cellulose, the most readily available renewable material on the planet. Additionally, on our new superlight frames will be using our revolutionary SHRED NOWEIGHT technology in a lower environmental impact polymer formulation. Cellulose acetate comes from wood pulp, an entirely renewable resource and thus does not compete for food resources. Our use of plant based cellulose is another step we have taken toward responsible practices aimed to protect our planet from the harms of humanity.

MULTILAYER  
ACETATE

This frame is handmade through a long process of milling uniquely crafted cellulose acetate sheets. Once assembled, the sunglasses go through tumbling drums filled with beech and birch wood and polished by hand to provide SHRED's stunning matte finish. The basic material for cellulose acetate, plant cellulose, is the most readily available renewable material on the planet. Cellulose acetate comes from wood pulp, an entirely renewable resource. It also has a much lower CO2 manufacturing footprint when compared to petroleum-based products.

**NODISTORTION™**  
with **nxt**

bringing our NODISTORTION™ technology from goggles to shades. Crafted and tested under the most extreme conditions, NXT™ lenses are tested under the harshest of conditions with the US Air Force. Designed to provide unparalleled vision quality and durability, liquid cast NXT™ lenses result in crystal clear vision.

As a result of our constant and relentless innovation, we sought to improve upon an already stellar offering of sunglasses by

POLARIZED

SHRED POLARIZED lenses reduce glare by blocking out all angles of scattered and reflected light from surfaces such as snow and water. The polarization process eliminates light that distorts color and enhances depth perception and vision. The result is a clean lens that delivers proper clarity and contrast and achieves the optical perception Shred was after.

FORGED  
5 BARREL  
HINGES

The tough 5 barrel forged stainless steel hinges provide ultimate mechanical precision.

FORGED  
7 BARREL  
HINGES

The ultra tough 7 barrel forged stainless steel hinges provide unparalleled toughness, durability, and precision.

For the perfect finish on these sunglasses we handmade each pair and used the finest materials to create items with a level of quality and style that cannot be replicated.

BASE SIX CURVE

The base determines the form of a lens and measures the surface curve. A base 6 curve lens means the sunglasses will provide a flatter look to the frame.

BASE EIGHT CURVE

The base determines the form of a lens and measures the surface curve. Base 8 curve lenses will make SHRED frames hug closer to the face compared to a base 6 curve.

HYDROPHOBIC

SHRED OLEO-HYDROPHOBIC lenses are treated with a permanent special protective coating that makes the surface extremely water and grease repellent, preserving the best vision even when the weather gets nasty or when nasty fingers touch their surface.

WOOD

Palisander, pear wood, bamboo. So simple yet so elegant. From the core in its true essence.

GRIP-ON

Grip-On components on nose and/or temple arms provide the necessary grip so that your sunglasses will not slip off your face.

MADE  
IN  
ITALY

These premium sunglasses are stamped in their entirety with the superior quality only associated with Italian shades craftsmanship.

**NOWEIGHT** Our new SHRED NOWEIGHT technology, which is a derivative of structural engineering studies, allows us to create a shape that minimizes the amount of material used while maximizing the stability and performance of the eyewear. The sunglasses are durable and sturdy, but the reduced amount of materials utilized in the final product creates an item that you don't even feel on your face.

Join us, Waves for Water, and our athletes' mission to supply potable drinking water to everyone who is without.

@shredoptics    shredoptics.com

@wavesforwater    wavesforwater.org

The image features a stylized white logo on a dark, textured background. The logo consists of a sharp, curved white line on the left, followed by the word "SLYFECH" in a bold, italicized, sans-serif font. The letters are white and have a slight 3D effect with shadows. The background is dark and appears to be a close-up of a mechanical or industrial surface.

**SLYFECH**

The particular microstructure of the SLYTECH 2ND SKIN™ XT foam compound earned its peerless reputation through its pattern of homogenously arranged polygonal cells separated by membrane walls. This extraordinary behavior of the special polygonal-cell-foam internal microstructure is the key to understanding the SLYTECH 2ND SKIN™ XT's superior protection and comfort. Already soft at room temperature, and even at lower temperatures, when worn and warmed by your body heat, the polygonal-cell foam becomes even more flexible and contours to your body's shape, just like clay. The soft pliable material actually is the most effective shock absorber available in back protection. Independent lab tests show that SLYTECH 2ND SKIN™ XT technology is up to 80% more protective than traditional body armor and 20% more protective than traditional soft protectors. All this with unparalleled comfort.

Upon impact, the polygonal-cell-foam compound performs as a progressive shock absorber that intelligently adapts to the different forces, impacts, and speeds of a crash. The shock absorption increases proportionally to the strength of the impact, so your body is protected completely at any impact level. When pressure is slowly applied, the membranes walls of the polygonal cells slide against each other through their contact planes and allow the cells to deform malleably. In contrast, when quick sharp pressure is applied, the force of the contact makes the membranes of the microstructure form a progressively stiffening and vibrating grid and the protector becomes rigid and deflects the blow. Different intelligent reactions by our SLYTECH 2ND SKIN™ XT apply just the right protection for every circumstance all the while keeping you warm, comfortable, and confident in your decent of the most intimidating mountain.

At Slytech, we refuse to make compromises when it comes to safety and comfort, and as a result of our proprietary SLYTECH 2ND SKIN™ XT foam material shaped under our new SLYTECH NOSHOCK™ proprietary design, we have widened the performance gap between our products and the field. In years past, we have been the market leader in both safety and comfort, but with our new SLYTECH NOSHOCK™ technology adapted for back and body protection, we have widened the gap in a four dimensional way. SLYTECH NOSHOCK™ technology design means that our gear is not only a 20% safer when compared to a plain design, but it is also way more comfortable, it has a lower specific weight and promotes better ventilation as a direct result of the honeycomb cone hollow structure.

We have carefully engineered all of our SLYTECH 2ND SKIN™ XT protectors to work with one another as part of our Modular Protection Concept. You can buy and use each piece individually or combine protectors to create a full body system that protects you from head to toe without sacrificing comfort, flexibility, and most importantly protection.

This product features Slytech's latest impact protection innovation with its SLYTECH 2ND SKIN™ XT Foam Technology. A layer of SLYTECH 2ND SKIN™ XT is added to provide a progressive shock absorber that intelligently adapts to the different forces and speeds at impact. The shock absorption increases proportionally to the intensity of the impact and to protect completely at any impact level. The SLYTECH 2ND SKIN™ XT recovers naturally from the impact and allows for better protection in a series of multiple impacts.

All Slytech Products are sourced with highest grade materials that under typical usage conditions will provide long life and durability. For those who are just a touch more radical, the BOMB PROOF TECHNOLOGY provides superior ripstop and puncture resistance thoroughly tested and proved by the best athletes in the world. Bomb proof durability.

FITTING TECHNOLOGY allows for ultimate freedom of movement with a combination of extremely flexible materials and designs.

To keep our protective products completely flexible and comfortable, we avoid hard plastic components.

A zipper/pocket allows for quick removal of the protective element from its covering material thus a very easy and fast washing of all the parts. Then the shock absorber can be easily washed and wiped. It dries very quickly.

The brand new Venting Pattern promotes the flow of air between the body and the shock absorbing protectors made in the SLYTECH 2ND SKIN™ XT Foam Technology.

Grip-On straps provide the necessary grip on shoulder straps so that they will not slip off your shoulders.

The shock absorbing element is designed to withstand multiple impacts, whether they are in quick succession on a slam or over the lifetime of the product. By returning to its original shape after impact, the protector is able to once again effectively absorb new shocks.

Our protectors meet and exceed EN-1621-2 Level 2, the European Standard for Back Protection for Motorcycle Sports. Certified EN-1621-2 Level 2 Back Protectors pass severe shock absorbing tests: the highest level of protection.

The shock absorbing element is designed to withstand multiple impacts, whether they are in quick succession on a slam or over the lifetime of the product. By returning to its original shape after impact, the protector is able to once again effectively absorb new shocks.

Our protectors meet and exceed the EN-1621-2 Standards also when tested at -20°C (-4°F) to simulate conditions typical to winter sports and other application at very low temperatures.

The super thick yet flexible and soft air-mesh is designed specifically for this application, and provides unrivaled ventilation and comfort.

This particular pattern enhances the flexibility of the SLYTECH 2ND SKIN™ XT and adds a superior ventilation system between its structural hexagons.

Our SLYTECH 2ND SKIN™ XT foam compound is completely free from Formamide, a toxic chemical usually found in similar compounds, non-allergenic and it does not contain harmful substances.

Keep everything in place with durable velcro to be positive all your protection stays where it should.

Pittards' KERAATAN™ is a unique leather treatment designed to significantly increase the abrasion protection and durability of Pittards' finest performance goatskin leathers. Its unique 'etched diamond' surface treatment, bonded to its structure, allows the leather to retain its flexibility and water resistance while achieving maximum abrasion protection. The benefits of KERAATAN™ are: extreme levels of abrasion resistance, retained performance, functionality and comfort, and longer effective life.

The ABS® Avalanche Airbag is the original self-rescue system – produced and tested by German avalanche experts since 1985. A quick tug on the ABS® TwinBag's activation handle is all it takes to instantly inflate two airbags with a total volume of 170 liters.

SuperFabric™

The highly durable, lightweight, flame resistant, abrasion resistant, breathable, stain resistant, superior grip, and slash resistant fabric.

X-STATIC™ is a fiber made with a layer of 99.9% pure silver, which is permanently bonded to the surface of the fabric, providing unparalleled Antimicrobial and Anti-odor properties. A permanent solution to keep your gear fresh, highly breathable, and extremely comfortable.

PrimaLoft® is the highest performing insulation on the market for warmth, water resistance, softness, and compressibility. PrimaLoft® is an ultra-fine microfiber insulation that is warm, soft, and lightweight (and is warmer - wet or dry - than all other insulations).

This special leather from Pittards provides the ultimate combination of feel and adaptive grip available in a performance leather for sports and other functional gloves.

A premium belt design with multiple options for regulating the tension for maximum back support and size adjustment. Connects perfectly with GRIP-ON shoulder straps for seamless functionality of the protector system.

Providing year-round comfort and multisport ultimate protection.

NOSE WIPE

A soft touch in the cold and harsh weather.

The market leader in hydration reservoirs.

Expander super stretchy fabric glues the protective element to your back, matching even the most dynamic movements.

TOUCH SCREEN FUNCTIONALITY on designated fingers.

# BODY PROTECTION

We believe that dreams meet reality on the path of steady progression, both in sport and throughout our mission to revolutionize protection. Our SLYTECH NOSHOCK™, SLYTECH 2ND SKIN™ XT and SLYTECH one have been independently proven to be not only the safest available material in impact protection, but it is also the most comfortable. They will give your body shelter from impact 80-100% more effectively than traditional hard-shell protectors, and 20-40% better than traditional soft-protection systems.

Relentlessly dedicated to improving our products for our riders, we constantly improve our technology in order to build more comfortable products, without sacrificing any protection qualities. It's important to continuously push the progression of our inventions; otherwise our offerings will not keep pace with the athletes using them.

photo // kjell ellefson

# BACKPROTECTORS

Our back-protection line offers options tailored for every and all missions: high-speed assaults, backcountry adventures, and pipe and park sessions. At the core of our back protectors are our three tier technologies SLYTECH NOSHOCK™, for the ultimate performance, SLYTECH 2ND SKIN™ XT for the tried and true, and SLYTECH one as a cost-effective solution still providing the best protection/comfort tradeoff in the market. Our progressive and intelligent closed cell foam protectors, in the three different configurations ensure you more days on the mountain. Our back protectors meet and exceed the highest levels of European Standards (EN 1621-2: Level 2).

# IMPACT

Special missions call for custom-designed products to match our riders' most demanding moments. At the core of our impact line are our revolutionary SLYTECH NOSHOCK™ and SLYTECH 2ND SKIN™ XT. The Impact line has the protection pieces completely complementary to our back protectors to add further safety, comfort, and confidence to the missions that need the most protection.

### SHORTS MULTIPRO XT

- slytech 2nd skin xt™ technology for the tried and true.
- premium elastic mesh ensures a snug fit.
- customizable protection.

code: YXTSHPD  
sizes: S, M, L, XL

### SHORTS MULTIPRO NOSHOCK™ XT

- slytech noshock™ technology for the ultimate performance.
- premium elastic mesh ensures a snug fit.
- 100% customizable protection.

code: YNSSHPF  
sizes: S, M, L, XL

### JKT SUBPRO RACE XT

- slytech 2nd skin xt™ technology for the tried and true.
- x-static silver fiber technology for extreme comfort and odor control.
- expander fabric glues the protective elements to your body.

code: YXTSPRD  
sizes: XS, S, M, L, XL

### JKT SUBPRO LONG XT

- slytech 2nd skin xt™ technology for the tried and true.
- x-static silver fiber technology for extreme comfort and odor control.
- expander fabric glues the protective elements to your body.

code: YXTSPLE  
sizes: XS, S, M, L, XL

### JKT SUBPRO SHORT XT

- slytech 2nd skin xt™ technology for the tried and true.
- x-static silver fiber technology for extreme comfort and odor control.
- expander fabric glues the protective elements to your body.

code: YXTSPSE  
sizes: XS, S, M, L, XL

- slytech 2nd skin xt™ technology for the tried and true.
- adjustable velcro straps for a perfect fit.
- essential design for a minimalist perfection and low profile.

#### SHOULDERPRO RACE XT Naked

code: YXTPPRD12  
sizes: ONE SIZE FITS ALL

#### 4ARMPRO RACE XT Naked

code: YXTPPRD11  
sizes: ONE SIZE FITS ALL

#### ELBOWPRO XT Lite

- slytech 2nd skin xt™ technology for the tried and true.
- expander fabric glues the protective elements to your body.

code: YXTEPLD11  
sizes: S/M, L/XL

#### KNEEPRO XT Lite

- slytech 2nd skin xt™ technology for the tried and true.
- expander fabric glues the protective elements to your body.

code: YXTKPLD11  
sizes: S/M, L/XL

# HAND PROTECTION

SLYTECH Gloves are a reach in technology and innovation. SLYTECH 2ND SKIN XT and SLYTECH one foam protection technology provide needed protection. The finest and most advanced materials and functional design keep hands warm//cool and dry.

### FORTRESS PWD - 3 in 1

- slytech 2nd skin xt™ technology for the tried and true.
- 3 in 1 glove for any kind of weather and temperature.
- touch screen functionality on inner glove's thumb, index and middle finger of both hands.
- nose wipe on both outer and inner glove.
- primaloft insulation.
- grip control layer on the palm of both outer and inner gloves.
- ax suede and x-static for maximum wear resistance and sweat control
- hook & loop closure and neoprene cuff for a snug fit.

code: **YXTFPWF**

sizes: S, M, L, XL

### FORTRESS PARK MITTS

- slytech 2nd skin xt™ technology for the tried and true.
- touch screen functionality on thumb of both hands.
- nose wipe on both outer and inner glove.
- primaloft insulation.
- grip control layer on the palm.
- ax suede and x-static for maximum wear resistance and odor control
- hook & loop closure and neoprene cuff for a snug fit.

code: **YXTFPMF**

sizes: S, M, L, XL

### FORTRESS PARK FINGERS

- slytech 2nd skin xt™ technology for the tried and true.
- touch screen functionality on thumb of both hands.
- nose wipe.
- primaloft insulation.
- grip control layer on the palm.
- ax suede and x-static for maximum wear resistance and odor control
- hook & loop closure and neoprene cuff for a snug fit.

code: **YXTFPFF**

sizes: S, M, L, XL

### FORTRESS RACE ONE MITTS

- slytech one as a cost-effective solution still providing the best protection/comfort tradeoff in the market.
- nose wipe.
- neoprene cuff for a snug fit.
- overlay panel for perfect compatibility with armguards protection.
- anti abrasion fabric on the back of the hand.

code: **YNEFRMF**  
sizes: XXS, XS, S, M, L, XL

### FORTRESS RACE MITTS midnight

- slytech 2nd skin xt™ technology for the tried and true.
- nose wipe.
- primaloft insulation.
- super tacky grip control layer on the palm.
- x-static silver fiber for odor control
- neoprene cuff for a snug fit.
- overlay panel for perfect compatibility with armguards protection.
- superfabric armor plates on the back of the hand to withstand the harshest handdragging.
- pittards keratan for extreme levels of abrasion resistance, functionality, comfort, and longer life.

code: **YXTFRMF**  
sizes: XXS, XS, S, M, L, XL

### FORTRESS RACE MITTS blue

- slytech 2nd skin xt™ technology for the tried and true.
- nose wipe.
- primaloft insulation.
- super tacky grip control layer on the palm.
- x-static silver fiber for odor control
- neoprene cuff for a snug fit.
- overlay panel for perfect compatibility with armguards protection.
- superfabric armor plates on the back of the hand to withstand the harshest handdragging.
- pittards keratan for extreme levels of abrasion resistance, functionality, comfort, and longer life.

code: **YXTFRMD**  
sizes: XS, S, M, L, XL

### FORTRESS RACE FINGERS blue

- slytech 2nd skin xt™ technology for the tried and true.
- nose wipe.
- primaloft insulation.
- super tacky grip control layer on the palm.
- x-static silver fiber for odor control
- neoprene cuff for a snug fit.
- overlay panel for perfect compatibility with armguards protection.
- superfabric armor plates on the back of the hand to withstand the harshest handdragging.
- pittards keratan for extreme levels of abrasion resistance, functionality, comfort, and longer life.

ted ligety

102 **SYNTECH** got my back.

The new SLYTECH SHIELD line represents yet another huge step forward in gate protection technology. It provides both materials and designs that maximize stiffness and minimizes friction on the impact with the gates. With Slytech proprietary 3DN deviators technology, and a polymer compound that aids gliding, SLYTECH SHIELD pushes the boundaries of performance and speed. SLYTECH SHIELD Carbon is the line of choice for the ultimate performance, and SLYTECH Shield is the line of choice for a cost-effective solution that is second to none.

SLYTECH SHIELD CARBON adds aerospace technology to the high performance of the SLYTECH SHIELD material. Carbon fiber technology, combined with our years of technical experience, has allowed us to create a high performance product that offers considerable racing advantages whereby impact with gates does not result in energy transfer to the athlete. The new production process ensures much greater durability than competitors' traditional prepreg laminate products making it possible to obtain an extraordinarily durable yet lightweight shell.

By increasing the stiffness of the shell, the use of the MULTI-DN IMPACT TECHNOLOGY with 3 or 4 deviators, maximizes the speed of passage over the pole drastically reducing the friction generated during impact between the athlete and pole and the subsequent slide.

The shell's anatomic shape allows for a perfect and comfortable fit of the shinguard and forearmguard to the athlete's leg and arm.

SLYTECH SHIELD is our new engineered material for our guards that is made with the most advanced technopolymers making it extremely stable and durable while simultaneously promoting maximum glide during contact with gates from the coldest nights to the warmest days. the coldest nights to the warmest days.

SLYGRIP FOAM, is made with ARIAPRENE™ and offers optimal comfort and superior grip even at extremely low temperatures.

EVO DEFLECT TECHNOLOGY: the deviators provide explosive recoil off the gate, minimizing time-wasting friction.

The shells of the protectors are made with the advanced technopolymer Zytel® by Dupont®, a special plastic that is extremely stiff and durable and performs extremely well in a very broad range of temperatures. The Assault are cost effective versions of the Original Slytech 4armguards and shinguards that does not compromise performance.

ARIAPRENE™ is a revolutionary alternative to synthetic rubber. It's non-toxic, easily decomposable, readily recyclable, and actually outperforms the less eco-friendly alternatives.

Ready-On straps provide an effective tighten/release system that allows for fast on-off and race-ready fitting.
